

AGRICULTURAL ENGINEERING

The Journal of the

American Society of Agricultural Engineers

Index to Volume 7—January to December, 1926

1926	Pages	Colonization, Land (Development; Settlement)	more efficient agriculture through explosives
January	1-40	What federal reclamation should include (Elwood Mead)	277
February	41-80	Combines (Combined Harvester-Threshers)	240
March	81-112	(See also Drying, Grain)	Farm Home (See Home)
April	113-168	Factors in extending the use of the combine harvester (M. A. McCall)	Farm House (See Home)
May	169-200	Results of Illinois tests of combines (I. P. Blauser)	Farm Machinery (See Machinery)
June	201-232	First hand experience with the combine (B. S. Harris)	Farm Structures (See Buildings)
July	233-264	Cook, Max E.—Progressive construction of farm homes	Ferguson, F. L.—Drainage extension work in Ontario
August	265-296	Corn Borer by Machinery, Control of the (C. O. Reed)	406
September	297-336	Cotton Production, Use of Machinery in (D. W. Watkins)	Fire Prevention (Protection)
October	337-368	Davidson, J. B.—A national program of research in mechanical farm equipment	A method of studying farm fires (E. G. Lantz)
November	369-400	Dent, J. Grant—Strength of lap soldered joints	The place of metal roofs in the reduction of farm fire hazards
December	401-432	Strength tests of threaded pipe joints	411
		Dickey, Ellen R.—Improving the farm home	Fletcher, L. J.—Rural electric service from the Western standpoint
		Disk Harrow, A Study of the Dynamics of the (E. G. McKibben)	407
		Disk Plow, The Development of the (R. C. Ingersoll)	51
		Drainage	German Scientists See U's, As
		A balanced cost schedule for tile trenching (H. B. Roe)	347
		Depth of drains for reclamation of irrigated lands (L. T. Jessup)	Giese, Henry—A method of research as applied to a project on the air requirements of poultry
		An extension project in farm drainage (R. L. Patty)	20
		Research in farm buildings (R. W. Trullinger)	Grain Drying (See Drying, Grain)
		Drainage extension work in Kentucky (E. G. Welch)	Gray, R. M.—A mud ranch house designed by a California engineer
		Research, 1925 (R. W. Trullinger)	276
		Drainage extension work in Ontario (F. L. Ferguson)	Harris, B. S.—First hand experience with the combine
		Drying, Grain	352
		Grain storage, drying and shrinkage problems (E. W. Lehmann)	Heating
		Duffee, F. W.—A study of factors involved in ensilage cutter design	A plea for a farm home designed for proper heating (W. B. Jones)
		Dunlap, Nora B.—What we farm women want our homes to be	145
		Eberlin, A. P.—Modern plumbing and heating as a factor in farm home improvement	Heimpel, L. G.—Crankcase dilution in kerosene tractors
		Ekblaw, K. J. T.—Some factors in farm house planning	273
		Electricity	Hemphill, R. G.—Irrigation investigations in Texas
		Research in (R. W. Trullinger)	56
		Results from artificial lighting of laying houses (G. W. Kable)	Hoffman, A. H.—Mapping the dust concentration around small tractors
		Research, 1925 (R. W. Trullinger)	12
		Rural electrification from an economic and engineering standpoint (L. S. Wing)	242
		Electrically heated chick brooders (G. W. Kable)	Home, Farm
		Rural electric service from the Western standpoint (L. J. Fletcher)	An effort for better farm homes (D. G. Carter)
		Ensilage Cutter Design, A Study of Factors Involved in (F. W. Duffee)	115
		Erosion, Soil (Terracing)	Agricultural engineering and the farm home (F. A. Wirt)
		Research in (R. W. Trullinger)	116
		Research, 1925 (R. W. Trullinger)	Organization of the National Farm Homes Conference
		The porous dam method of erosion control (G. Muehleisen)	117
		Explosives	Report of Resolutions Committee to the National Farm Homes Conference
		How agricultural engineers promote	118
			Purpose of Farm Homes Conference (D. G. Carter)
			An analysis of farm home needs (W. D. Brinkloe)
			What we farm women want our homes to be (Nora B. Dunlap)
			Wanted—an evangelist for the better farm homes movement (Nellie Kedzie Jones)
			Some factors in farm house planning (K. J. T. Ekblaw)
			The development of better farm homes (Louise Stanley)
			The agricultural engineer and the farm home (F. A. Wirt)
			Improving the farm home (Ellen R. Dickey)
			Program for farm home improvement (M. C. Betts)
			U.S.D.A. Bureau of Home Economics contribution toward a better farm homes program (Louise Stanley)
			Better farm homes aim of A.F.B.F. (Mrs. C. M. Sewell)
			The better homes in America movement (T. M. Sloane)
			Work of Department of Commerce in building and housing (J. M. Gries)
			Interest of American Home Economics Association in better farm homes (Eloise Davison)
			142

How farm papers promote better farm homes (J. F. Cunningham)	142	Meetings (A.S.A.E.)		Soil Erosion (See Erosion)	
Modern plumbing and heating as a factor in farm home improvement (A. P. Eberlin)	144	Meeting of North Atlantic Section	27	Soldered Joints, Strength of Lap (J. G. Dent)	351
A plea for a farm home designed for proper heating (W. B. Jones)	145	Pacific Coast Section meeting	101		
A plan for the reduction of plumbing costs in the farm home (A. W. Turner)	309	The 20th annual meeting	251	Standardization (Standards)	
Progressive construction of farm homes (M. E. Cook)	343	North Atlantic Section meeting	386	What simplified practice means to agriculture (R. M. Hudson)	210
Hudson, Ray M.—What simplified practice means to agriculture	210	Southwest Section meeting	387		
Huntington, Arthur—		Miller, T. A. H.—Durability of rammed earth walls	374	Stanley, Louise—	
The agricultural engineer holds the key to the agricultural situation	278	Muehleisen, Gottlieb—The porous dam method of erosion control	350	The development of better farm homes	129
Agriculture arrives at the industrial revolution	299	Nichols, M. L.—The program of research in mechanical farm equipment	3	U.S.D.A. Bureau of Home Economics contribution toward a better farm homes program	137
Ingersoll, R. C.—The development of the disk plow	172	Patty, R. L.—An extension project in farm drainage	53	Steel Barn, The Cole All- (W. B. Jones)	176
Irrigation		Pise de Terre (See Rammed Earth Construction)		Steel Barn, Some Observations on the All- (F. P. Cartwright)	241
Depth of drains for reclamation of irrigated lands (L. T. Jessup)	13	Pipe Joints, Strength Tests of Threaded (J. G. Dent)	373	Stewart, E. A.—The world power conference	409
Irrigation investigations in Texas (R. G. Hemphill)	56	Plow, The Development of the Disk (R. C. Ingersoll)	172	Storie, R. E.—A topographic, soil, alkali, and drainage survey of an irrigated farm in California	271
Research in irrigation (R. W. Trullinger)	62	Plumbing Costs in the Farm Home, A Plan for the Reduction of (A. W. Turner)	309	Stout, O. V. P.—The field of the American Society of Agricultural Engineers in Reclamation	45
Are current ideas basing duty of water experiments sound? (F. J. Velhmyer)	91	Power Conference, The World (E. A. Stewart)	409	Terracing (See Erosion)	
Irrigation by overhead sprinkling in California (H. A. Wadsworth)	177	Rammed Earth Construction		Tractors	
A topographic, soil, alkali, and drainage survey of an irrigated farm in California (R. E. Storie)	271	A mud ranch house designed by a California engineer (R. M. Gray)	276	Mapping the dust concentration around small tractors (A. H. Hoffman)	12
Research, 1925 (R. W. Trullinger)	312	Durability of rammed earth walls (T. A. H. Miller)	374	Research in (R. W. Trullinger)	60
Jessup, L. T.—Depth of drains for reclamation of irrigated lands	13	Randolph, J. W.—Tractor lug studies on sandy soil	178	Tractor lug studies on sandy soil (J. W. Randolph)	178
Jones, W. B.—The Cole all-steel barn	176	Reclamation		Crankcase dilution in kerosene tractors (L. G. Hempel)	273
Kable, G. W.—		(See also Clearing; Colonization; Drainage; Erosion; Irrigation)		Research, 1925 (R. W. Trullinger)	279
Equipment for treating seed wheat	14	The field of the American Society of Agricultural Engineers in reclamation (O. V. P. Stout)	45, 188	Treating Seed Wheat, Equipment for (G. W. Kable)	14
Results from artificial lighting of laying houses	374	What federal reclamation should include (Elwood Mead)	237	Trullinger, R. W.—	
Electrically heated chick brooders	376	The engineer and the soil—an orientation for reclamation (R. W. Trullinger)	243	National agricultural engineering research	59
Land Clearing (See Clearing)		Reed, C. O.—Control of the corn borer by machinery	305	Research in soil dynamics (editorial)	263
Land Colonization (See Colonization)		Research		The engineer and the soil—an orientation for reclamation	243
Land Reclamation (See Reclamation)		The program of research in mechanical farm equipment (M. L. Nichols)	3	Research in agricultural engineering, 1925	279, 312
Land Settlement (See Colonization)		A method of research as applied to a project on the air requirements of poultry (Henry Giese)	20	Turner, Arthur W.—A plan for the reduction of plumbing costs in the farm home	309
Lantz, E. G.—A method of studying farm fires	213	National agricultural engineering research (R. W. Trullinger)	59	Velhmyer, F. J.—Are current ideas basing duty of water experiments sound?	91
Lehmann, E. W.—Grain storage, drying and shrinkage problems	269	The vital need for greater financial support to pure science research (Herbert Hoover)	146	Ventilation	
Lugs, Tractor (See Tractors)		Research in agricultural engineering, 1925 (R. W. Trullinger)	279	A method of research as applied to a project on the air requirements of poultry (Henry Giese)	20
Machinery (Mechanical Equipment)		A national program of research in mechanical farm equipment (J. B. Davidson)	339	Research, 1925 (R. W. Trullinger)	312
(See also Combines, Standardization; Tractors)		River Bank Protection, Effective Form of	184	Wadsworth, H. A.—	
The program of research in mechanical farm equipment (M. L. Nichols)	3	Roe, H. B.—A balanced cost schedule for tile trenching	5	Irrigation by overhead sprinkling in California	177
Equipment for treating seed wheat (G. W. Kable)	14	Rural Electrification (See Electricity)		Effect of size of soil columns on the capillary rise of water	269
Depreciation of farm machinery (Lew Wallace)	49	Sanitation (See Heating; Sewage Disposal; Ventilation; Water Supply)		Walker, H. B.—The opportunities and requirements for cooperation	19
Research in (R. W. Trullinger)	60	Schwantes, A. J.—Stone removal as a phase of land clearing	403	Wallace, Lew—Depreciation of farm machinery	49
Factors involved in ensilage cutter design (F. W. Duffee)	84	Septic Tanks (See Sewage Disposal)		Water Requirements of Agricultural Crops (F. J. Velhmyer)	91
Dynamics of the disk harrow (E. G. McKibben)	92	Sewage Disposal		Water Supply	
The development of the disk plow (R. C. Ingersoll)	172	Research in (R. W. Trullinger)	62	Research in (R. W. Trullinger)	62
Haying with engineered methods and equipment	212	Some farm sanitation problems (J. R. Haswell)	208	Research, 1925 (R. W. Trullinger)	315
A new machine to combat the grape leaf hopper (J. P. Fairbank)	240	Research, 1925 (R. W. Trullinger)	315	Watkins, D. W.—Use of machinery in cotton production	349
Research, 1925 (R. W. Trullinger)	279	Sjogren, O. W.—		Welding Nickel-Chromium Alloys (A. H. Hoffman)	242
Control of the corn borer by machinery (C. O. Reed)	305	The A.S.A.E. program for 1926-27	236	Wing, L. S.—Rural electrification from an economic and engineering standpoint	345
A national program of research in mechanical farm equipment (J. B. Davidson)	339	Engineering development in agriculture	379	Wirt, F. A.—	
Use of machinery in cotton production (D. W. Watkins)	349	Soil Dynamics		How A.S.A.E. serves farmer and manufacturer	17
Materials of Construction		Tractor lug studies on sandy soil (J. W. Randolph)	178	The agricultural engineer and the farm home	131
Research in (R. W. Trullinger)	62	Research in soil dynamics (R. W. Trullinger)	203	The president's annual address	248
Research, 1925 (R. W. Trullinger)	316	The soil dynamics problem (E. G. McKibben)	412	Zon, Raphael—Engineering aspects of forestry	51
McCall, M. A.—Factors in extending the use of the combine harvester	88				
McKibben, E. G.—The soil dynamics problem	412				
Mead, Elwood—What federal reclamation should include	237
